

Biometric Identity Management Solutions

For almost 20 years we've helped businesses streamline their identity-dependant processes by providing certainty of identification for people and assets

The Biometric Enterprise

At our core, Argus TrueID is a biometric technology developer, focused on creating systems that streamline business processes and reduce risk through the unique and secure identification of individuals. Over almost twenty years, our extensive industry knowledge and expertise has enabled us to build technology solutions that span the 'Biometric Enterprise'. No matter the size or type of business, our applications address the gamut of business issues and challenges where certainty of identification for people and assets are required.

Access Control

Manage physical access rights, privileges and movements between zones

Visitor Management

Provides enrollment and movement control for visitors

Time & Attendance

Integrate with payroll systems to accurately manage time and attendance

Tagged Asset Management

Self-service biometric facility for managing the use and return of tagged assets

Keysafe Management

Self-service biometric access and policy management of keysafe

Professional Services

Design, build and implementation of integrated biometric solutions

The Argus difference

Our technology is trusted by the largest Government agencies in Australia as well as Tier 1 Corporates. They rely on our management platforms to protect their resources, provide secure access and mitigate risk.

Our solutions process millions of transactions flawlessly everyday, enabling us to streamline business processes for our clients across the globe.

OVER **ONE MILLION** ACTIVE USERS DAILY

PROCESSING **TEN MILLION** ID'S DAILY

AT SITES IN **TWENTY SEVEN** COUNTRIES

Biometric Identity Management Solutions

Biometric identification is fast, accurate, convenient, secure and increasingly cost effective. Traditional forms of tangible ID offer less security and can be duplicated or stolen. An individual's unique physical attributes (e.g. fingerprints) can be linked to pre-determined access rights, providing a higher level of security.

Solutions built on the TrueID framework can incorporate finger print identification, iris, facial, palm vein, voice, signature recognition and other biometric technologies as needed. This ensures each solution can use the technologies best suited to meeting the specific business requirements of the customer.

Argus TrueID Solutions are designed to scale from a single location installation, right up to an enterprise-wide multi-modal solution that spans across various locations, managing business operations via a single platform.

Fingerprint

Argus Professional Services

Argus evaluates client requirements and operating environment, then sources best-of-breed technology from around the globe to implement 'fit-for-purpose' solutions. In the process, mitigating risk for client during the research phase as well as the implementation of a biometrically enabled workflow solution that adds value to their business.

We understand processes, systems integration, commercialising risk value and have the best resources to support clients from the initial stage of the project to long after implementation.

For almost twenty years our team has provided market leading workflow solutions that are biometrically-enabled and ensure the highest level of certainty to our clients.

Our values

Our mission is 'helping protect our communities' because we believe everyone is entitled to live and work in a safe and secure environment. After significant R&D investment over the last 18 years we've developed a mature suite of solutions with an enviable track record. We're proud to be the largest Australian-owned provider of identity-dependent, biometrically-enabled solutions.

Agility

We anticipate change and adapt quickly

Value

We build convenience so you start realising the benefits fast

Innovation

We build solutions unique to Argus and ahead of the

Simplicity

We provide a single point of contact for everything we do

Experience

We make the user experience flawless

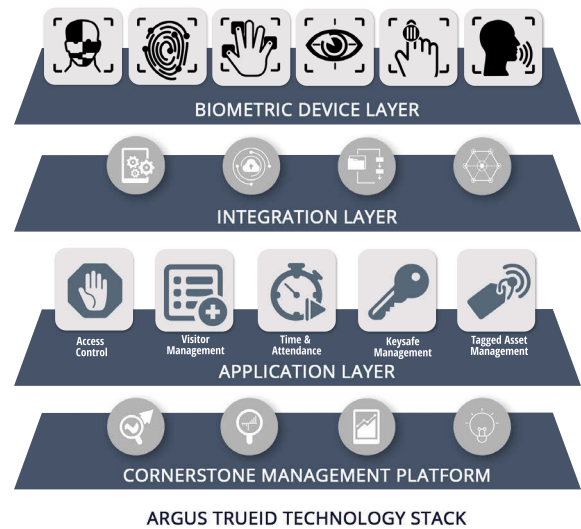

Certainty

We give our clients certainty of identification

Our technology stack

At the heart of each TrueID Solution is an enterprise-wide single point of biometric identification and authentication, built on the Argus TrueID Framework. Our TrueID stack ensures our clients are never locked into a single vendor. It allows the biometric technologies in each solution to be swapped out or modified as required. TrueID solution is built to expand and evolve with both advances in technology and developments in the client's requirements. The results are scalable solutions future-proofed to ensure a long life in a rapidly changing environment.

Our expertise

We have the right expertise and qualifications to make sure we deliver on time and on budget. Our consultants are PMP certified with extensive experience working with virtual teams across international boundaries.

Argus Operate to ISO 9001, 2000, 27000 & 15408 Standards

Architectural standards used include AAMVA, ICAO, NIST, JTC, FIPS 140-2 Level 3, AES FIPS-197, Triple-DES, Blowfish, PKI with RSA, SSL 128, X.509, BioAPI, ASIO T4, SCEC, Common Criteria EAL2.
