# Secure Childcare Management

## Do you need to increase childcare centre security and efficiency?

### Caresafe

Ensure security and certainty through biometric identification of parents dropping off or picking up children, with an automated, paperless system. Caresafe integrates a Government approved, web-based Child Care Management System with biometric access control and visitor management, providing an audit trail and ensuring centres remain compliant.

## Safety of key assets: children

**Problem:** Childrens safety

In a busy centre environment, carers cannot be 100% vigilant on who is coming and going.

**Solution:** Building access management

Set individual visitor or carer rights and provide certainty of identification through biometric verification.

**Problem:** Resource intensive process

Administrative tasks such as; entering data from manual sign in sheets, invoicing and consolidation of government rebate claims can be time consuming and open to error.

**Solution:** Streamline administration

Less time spent on administration means more time providing care. With our approved CCMS solution, management of operations, finance and rebate claims is simplified with automated processes and reporting, saving time and money for the centre.

## Resource intensive procedures

# The Argus difference

Our technology is trusted by the largest Government agencies in Australia as well as Tier 1 Corporates.
They rely on our management platforms to protect their resources, provide secure access and mitigate risk. Our solutions process millions of transactions flawlessly everyday, enabling us to streamline business processes for our clients across the globe.

OVER **ONE MILLION** ACTIVE USERS DAILY

PROCESSING **TEN MILLION** ID'S DAILY

AT SITES IN **TWENTY SEVEN** COUNTRIES

## Keeping up with changes

**Problem:** Keep up with changes

Running a child care centre can be challenging. Child Care providers must constantly review their systems, operations and policies to ensure compliance with everchanging requirements.

**Solution:** Software expertise

Being cloud based, all software updates are available immediately to all centres. Our agile software development approach means new Government requirements and the needs of individual centres are implemented quickly.

**Problem:** Multi-site sign-in

For centres with multiple locations or a mobile workforce, the challenge is to provide access and track reporting of carers and visitors to the centres.

**Solution:** Centralised management

Simplify administration with centralised workforce management. Set rules and access privileges to carers across multiple sites based on their biometric profile. Replicate and control policy from one central location with ease.

## Managing multi-site sign-ins
