

## Do you want to reduce stock shrinkage and improve profitability?

Assign and schedule access rights to the entire workforce across multiple sites based on the employee's biometric profile. Integrated systems such as CCTV and Keysafe to ensure authorised and controlled access. Provide oversight through reporting and analytics to deter misconduct and thus reduce shrinkage.

### **Problem:** Loss of stock and profit

Shrinkage occurs typically as a result of employees failing to follow procedure or policies and is common in the retail segment. This preventable loss impacts the business' bottom line.

### **Solution:** Access control

For a large workforce, the ability to set individual employee, visitor or contractor rights to pre-determined locations at approved scheduled times can provide certainty that the right person is in the right place at the right time.

### **Problem:** Inefficient manual procedures

Manual processes can be time consuming, resource intensive and prone to human error and exploitation. Management of keys is a prime example.

### **Solution:** Fit-for-purpose applications

Argus' Retail Loss Prevention solution removes manual processes, reducing potential for error and increases security and audit capability. Fit-for-purpose applications using biometrics technology at its core, to identify and validate individuals involved throughout the workflow.

## The Argus difference

Our technology is trusted by the largest Government agencies in Australia as well as Tier 1 Corporates. They rely on our management platforms to protect their resources, provide secure access and mitigate risk. Our solutions process millions of transactions flawlessly everyday, enabling us to streamline business processes for our clients across the globe.

OVER **ONE MILLION**  
ACTIVE USERS DAILY

PROCESSING  
**TEN MILLION**  
ID'S DAILY

AT SITES IN  
**TWENTY SEVEN**  
COUNTRIES

### Problem: **Multitude of disparate systems**

Retailers are faced with managing multiple systems in an operational setting with minimal data visibility and analytics.

### Solution: **Integration expertise**

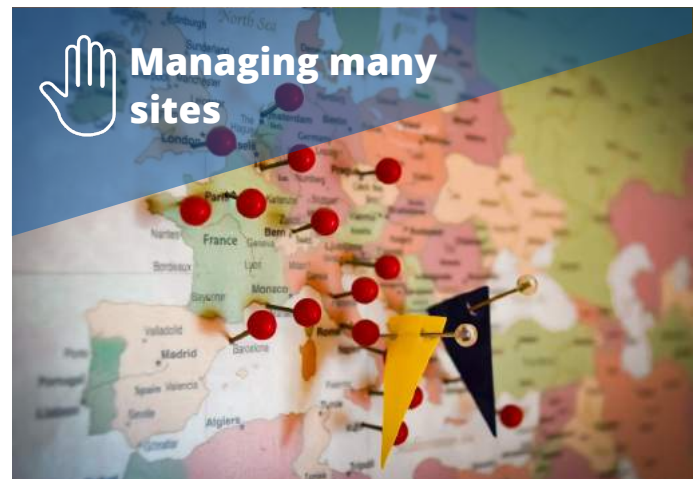

Argus' solution integrates with third party technologies including primary business operations (HR, Payroll & WHS), building management (Fire & Water), key safety and security (Access & Asset management) with streamlined reporting.

### Problem: **Multi-site management**

For retailers with multiple locations and/or a mobile workforce, the task is more than controlling access & tracking employees and assets. Management of the collective workforce is an ever-present challenge.

### Solution: **Centralised management**

Simplify administration with centralised workforce management. Set rules and access privileges to individuals across multiple sites based on their biometric profile. Replicate and control policy from one central location with ease.
